

Executive Summary: Athletics Event Dashboard

Overview

This dashboard provides a comprehensive summary of athletics event results, focusing on performance metrics and country-wise podium standings.

Key Insights

1. Fastest Time:

- The fastest recorded time in the dataset is 1.68 seconds.

2. Top 3 Countries by Podium:

- USA leads the podium standings, followed by Germany (GER) and Australia (AUS).

3. Participant Data:

- The table displays detailed records of athletes, including their names, positions, countries, genders, event types, marks, and local times.
- Notable participants include Camryn Newton-Smith, Tori West, and Daniel Golubovic from Australia.

4. Interactivity:

- The dashboard includes filters for Name, Gender, Country, Event, and Time, allowing users to interactively explore the dataset.
- Hyperlinked 'Startlist' and 'Results' provide easy navigation to detailed event-specific data.

5. Observations:

- Australian athletes are prominently featured across multiple events, suggesting a strong national presence in the competition.
- The data is well-organized and suited for performance analysis across genders and event types.

Conclusion

This dashboard is a valuable tool for stakeholders looking to evaluate athletic performances and compare country-wise results effectively. It highlights top-performing countries and athletes and offers flexible data
